Document Source

Document PDF

test repo for building openscad files into different outputs

This is still work in progress but can already build a png and stl of each scad file in the opescad directory.

See the online or pdf versions for the images as the readme is really only the source and right now is not WYSIWYG!

## 2. Objects

### 2.1. Object - Library-container

Figure 1. image

Listing 1. Openscad source

```

## 2.2. Object - case

A case for an odroid handgeld console and accessories.

The edges are rounded and there are cutouts for the parts that protrude from the console.

Figure 2. image

```

## 2.3. Object - fastener

This is a fastener for a writing Desk.

The idea is to add a magnet to hold it up and to print it so that it does not require a bearing.

V1 is the first prototype for a first print test and fitting test.

Figure 3. image

Listing 3. Openscad source

```

$fn=100;

```

```

mainLength=50;
mainD=15;
mainH=10;
axleD=10;
axleDout=axleD+3;
ringH=2;

magnetX=17;
magnetY=5;
magnetZ=2;

module axle(xxlX,xxlY) {
    translate([0,0,-xxlY/2])cylinder(h=mainH+xxlY,d=axleD+xxlX);
    translate([0,0,((mainH-ringH)/2)]) cylinder(h=ringH,d=axleDout+xxlX);
    translate([0,0,(mainH/2)-((axleDout-axleD)/2+ringH/2)])
cylinder(h=(axleDout-axleD)/2,d1=axleD+xxlX,d2=axleDout+xxlX);
    translate([0,0,(mainH/2)+(ringH/2)]) cylinder(h=((axleDout-
axleD)/2),d2=axleD+xxlX,d1=axleDout+xxlX);
}
module clip() {
    difference() {
        union(){
            hull(){
                cylinder(d=mainD,h=mainH);
                translate([mainLength,0,0]) cylinder(d=mainD,h=mainH);
            }
            translate([10,-5,mainH]) linear_extrude (height=2) {
                text("V2");
            }
        }
        //magnet
        translate([mainLength-magnetX,-magnetZ/2,(mainH-magnetY)/2])
cube([magnetX,magnetZ,magnetY+10]);
        //holder
        translate([mainLength-magnetX-1,-(mainD/2)-1,-.1])
cube([magnetX+2,magnetZ+mainD,2]);
    }
}

difference () {
    clip();
    axle(1,1);
}
difference(){
    axle(0,0);
    translate([0,0,-.05]) cylinder(h=mainH+.1,d=2);
}

```

## 2.4. Object - ikeaabung

This was a replacement foot for an IKEA shelf.

The actual foot was screwed in with a bolt on the underside.

Figure 4. image

Listing 4. Openscad source

```
$fn=100;
totH=30;
baseH=6;
baseW=32;
wingW=3.5;
wingD=8;
centreD=17;

for (i = [0:360/6:360]) {
  rotate([0,0,i]) translate([((baseW-2)/2)-wingD,-wingW/2,baseH])
  cube([wingD,wingW,totH-baseH]);
}
```

```
difference(){
  union(){
    cylinder(h=totH,d=centreD);
    cylinder(h=6,d=32);
    translate([0,0,baseH]) cylinder(h=6,d1=baseW-2,d2=22);
  }
  translate([0,0,-.1]) cylinder(h=totH+.2,d=8.2);

  translate([0,0,-.1]) cylinder(h=8.1,d=15,$fn=6);
}
```

## 2.5. Object - test

Figure 5. image

Listing 5. Openscad source

```
$fn=100;
#cube([10,10,10]);
```

```
sphere(d=12);
```

## 2.6. Object - test2

Figure 6. image

Listing 6. Openscad source

```
$fn=100;  
cube([10,10,10]);  
#sphere(d=12);
```

## 3. To do

Right now the github source is not perfect as the readme does not display the images when viewed in github.

Need to add further process steps for the images like meshlabserver to do further processing:

- glass rendering
- cleaning up the mesh
- Simplifying the mesh
- Stats

Need to add animation options.

- ☒ Need to add text display option for each item.

Need to add view parameters as options.
